

Dear Year 5,

I am writing to you to explain you have made a slight hiccup with your investigation! In a science experiment, you have to have one variable which is changed and every thing else remains the same.

Unfortunately, what you have done is not a fair test. You need to make a list of the variables and explain how you will control these fairly.

I am interested to see if you can make these changes.

Yours sincerely,

Mr Good.

Science Co-ordinator

Dear Year 5,

I am writing to you to explain you have made a slight hiccup with your investigation! In a science experiment, you have to have one variable which is changed and every thing else remains the same.

Unfortunately, what you have done is not a fair test. You need to make a list of the variables and explain how you will control these fairly.
