Famous Facts

Believe it or not!

Toucans spend a lot of their time in trees, they aren't the best fliers around.

To be able to expand a fact.

The Toco Toucan is actually the largest toucan of all the species, measuring in at a whopping 25 inches (63.5 cm) with an 8 inch (19cm) neon orange beak.

The toucan's colorful brilliance is actually smartly designed camouflage for the rainforest.

The toucan's enormous bill means that when compared to the size of its body, it has the largest bill of all the world's birds.

Toucans are an endangered species

South America is the home of the toucan.

Toucan's take shelter in hollowed out trees usually created by Woodpeckers.

Toucans manage their body temperature by adjusting the blood flow to their beak as more blood means more heat release. Due to this, the creatures sleep on their beak to conserve heat.

A baby toucan is incubated for around 20 days, when they are born they don't have their characteristic beak, they develop this as they grow.

To be able to use a range of sentence openers

What you did well:

- * Topic vocabulary
- * Conjunctions
- * Expanding and explaining a fact
- * Grouping similar information together

Next steps

- * Vary sentence openers
- * All sentences make sense
- * Vary sentence types
- * Accurate use of commas
