

The Good Weather is Finally Here

How fantastic it has been over the last few days to see the weather resembling something like summer. Looking at the forecast it looks set to follow on into next week so please send your child to school with a water bottle each day and also a hat and sun cream are recommended too.

From Monday the government's advice on bubbles will change, however within the guidance it does state that schools may continue with the current measures until the end of the summer term. As a school we wish to do this as such a sudden transition for the staff we feel is unfair. This year has been incredibly hard for all staff in school, especially during periods when the infection rate has soared, and it will take time for all of us to come to terms with the new measures which will be in place in September. However, from Monday it will no longer be necessary for whole bubbles to isolate should a child or staff member have to self isolate which will begin to bring some normality back. Touch wood, we have been so fortunate with bubble closures and this is down to the measures we have all followed and also I am sure a lot of good fortune. For example, my own daughter, Tilly, currently in her last year of school, will have to spend the remainder of her primary school days in self isolation and is desperately sad about this. I for one will be incredibly glad to see an end to bubbles and am so glad that Stoneferry's year 6 class will have the opportunity to enjoy some more fun activities before they leave us next week.

Mr Raw, Head of School

Tennis Success

On Wednesday it was great to have our tennis coaches back into school to work with all of the children. These sessions have been excellent in developing the children's striking skills and we have been very impressed with the level of coaching the children have received.

The two coaches from Nuffield have really bonded with the children and developed excellent relationships which have in turn allowed them to impart their knowledge really well.

Final sessions are next Wednesday so please could all children come to school in their kits for one last time on Wednesday 21st July.

The Nuffield run lessons at their base on the Kingston Retail Park and would be happy to provide more lessons for any child in the school.

Sporting Superstar

This week's sporting superstar is Luke in Year 4.

Each week, Luke plays football for West Hull Yorkie Wolves under 10's where he plays striker. He has just finished the season at the end of May where they won the league!

This picture is of Luke after having played in a big tournament at Withernsea, where his team finished as semi final-ists! During the summer he will be playing in tournaments ready for his new season in September.

Well done Luke, we are really proud of you and wish you well for the new season!

Stand out moments

There are so many children doing so many great things in school. Here are some more children who have caught my eye this week: In F1 it is great to see Jacob's confidence growing, in F2 Pasha has impressed me with his beautiful manners, in Y1 Zion reading CVC words with Miss Parker was fab, in Y2 Mrs Dorley's Thursday reading club are all amazing and have brilliant attitudes, in Y3 Caitlin's good mornings always make me smile, in Y4 Billy's writing and art skills stood out, Victry's calm manner with her brothers is wonderful in Y5 and in Year 6 Megan and Emily's amazing lamp blew me away! Well done.

Geography Competition

Thank you to all the children who have entered the Geography competition. Winners of the competition were Finley (KS2) and Jessica (KS1). They both designed incredible eco friendly forms of transport, and completed some amazing research to help them do this. Materials to be used, how the transport would be powered and how people would use it were all considered and detailed evidence of how designs changed and were finalised were both incredible from both of them. They both genuinely deserved to win and will receive their prizes next week. Well done!
